

Dr Ayda Helles

Doctor of Breast cancer screening unit, Remal medical centre (primary health centre), Ministry of Health, Gaza, Palestine

My (two week, observational) training course in King's college hospital was great opportunity which makes me better in reading mammograms & better in communication with patients & shows me that there's much more we need to learn to improve breast cancer screening in Gaza.

I wanted to see how experts do & organize the work &The symposium made the dream true. Everyone was cooperative.

I hope to have another opportunity in the near future for a longer period.
